Summary

The Canadian National Fire Database (CNFDB) Fire Point and Polygon Data is a collection of forest fire locations and fire perimeters as provided by Canadian fire management agencies including provinces, territories, and Parks Canada. The forest fire data contained in the CNFDB have a wide range of uses including national scale mapping, statistical and spatial analysis and research involving natural disturbance.

Note that the "large fire" version of the database includes only large fires greater than 200 hectares (as reported by agency) — these represent a small percentage of all fires but account for most of the area burned (usually more than 97%).

Description

The Canadian National Fire Database (CNFDB) Fire Point and Polygon Data is a collection of forest fire locations and fire perimeters as provided by Canadian fire management agencies including provinces, territories, and Parks Canada.

To create the Canada-wide product, the data collected from each agency are projected into a common format and combined with data from other agencies; attribute fields are standardized; agency specific attribute fields are removed; and polygon areas are calculated using GIS.

Note that the data contained in the CNFDB are not complete nor are they without error. Locations are approximate. Not all fires have been mapped, and data accuracy varies due to different mapping techniques. This collection includes only data that has been contributed by the agencies. Data completeness and quality vary among agencies and between years.

For analyses for a single province or territory or for Parks Canada, we suggest you contact the appropriate agency. Links to the agency web sites can be found <http://cwfis.cfs.nrcan.gc.ca/ha/nfdb>, or can be found through the Canadian Interagency Forest Fire Centre (CIFFC) website at <http://www.cifcc.ca>

The database is a large collaborative effort by all Canadian fire agencies. We thank the many individuals who contributed to this effort, including fire crews, field personnel, photo interpreters, pilots, digitizers, and analysts. Compilation of the Canada-wide database was partially supported by the Canadian government programs of ENFOR (ENergy from the FORest), the Program on Energy Research and Development, the Climate Change Action Fund, and Action Plan 2000.

Please note that an End-User Agreement is required for accessing these data. Please refer to this agreement for information regarding restrictions of use -- https://cwfis.cfs.nrcan.gc.ca/downloads/EUA/End_User_Agreement_EN.html.php

Note that the "large fire" version of the database includes only large fires greater than 200 hectares (as reported by agency) — these represent a small percentage of all fires but account for most of the area burned (usually more than 97%).

=====
=====

CNFDB – Agency Data contains polygon data for the following agencies and years:

BC 1917-2020
AB 1931-2020
SK 1945-2020
MB 1928-2020
ON 1963-2020
QC 1973-2020
NS 1976-2020
NB 1980-2013
NL 1980-2016
YT 1946-2020
NT 1965-2020
PC 1923-2015

(Note: more details regarding sources and updates under Resource Details - Supplemental Information)

=====
=====

Les données ponctuelles et polygonales de la BNDFFC sont recueillies auprès des agences de gestion des feux de forêt, y compris celles des provinces et territoires et Parcs Canada. Pour obtenir un produit pancanadien, les données recueillies auprès de chaque agence sont projetées dans un format commun et combinées aux données d'autres agences, les champs d'attributs sont normalisés, les champs d'attributs propres à une agence sont supprimés, et la superficie des polygones est calculée à l'aide d'un SIG.

Il est à noter que les données contenues dans la BNDFFC ne sont ni exhaustives ni sans erreur. Tous les feux n'ont pas été cartographiés, et l'exactitude des données varie selon les différentes techniques de cartographie. Cette base de données ne contient que les données fournies par les agences. L'exhaustivité et la qualité des données peuvent varier d'une agence et d'une année à l'autre.

Pour obtenir des analyses à l'égard d'une province ou d'un territoire unique ou de Parcs Canada, communiquez avec l'agence responsable appropriée. Les liens aux sites Web des agences sont disponibles via le [Centre interservices des feux de forêt du Canada \(CIFFC\)](#).

Cette base de données est le fruit d'un travail de collaboration entre tous les organismes de lutte contre les incendies du Canada. Nous remercions tous ceux qui ont contribué au projet, notamment les équipes de pompiers, le personnel de terrain, le personnel de photo-interprétation, les pilotes, les responsables de la numérisation et les analystes. Le travail de compilation de cette base de données à l'échelle canadienne est appuyé par les programmes canadiens ENFOR (Programme de l'énergie forestière) et PERD (Programme de recherche et développement énergétique) et par le Fonds d'action sur le changement climatique et le Plan d'action 2000.

Veuillez noter que vous devez accepter les conditions de l'Entente d'utilisation de la Base nationale de données sur les feux de forêt pour pouvoir accéder aux données. Cliquez sur le lien suivant pour consulter le texte de cette entente et connaître les restrictions concernant

l'utilisation des données

SUPPLEMENTAL INFORMATION

Version notes regarding data updates and sources:

BC:

- BC fire data updates downloaded from DataBC website <http://apps.gov.bc.ca>;
- This version of NFDB poly includes BC polys for 1917-2020;
- 2020 updates added in this update;
- Note that all years include small fires (< 200 ha); Most years > 2002 include fires > 0.1 ha; Most years 1950-2002 include fires > 10 ha;
- The BC fire perimeter data is published by the BC Ministry of Forests, Lands and Natural Resource Operations - BC Wildfire Service Licensed under Open Government License - British Columbia -- <http://www2.gov.bc.ca/gov/content/governments/about-the-bc-government/databc/pendata/open-government-license-bc>

AB:

- AB fire data updates downloaded from Alberta Wildfire website <https://wildfire.alberta.ca/resources/historical-data/spatial-wildfire-data.aspx>
- This version of NFDB poly includes AB polys for 1931-2020;
- Missing years: 1937;
- 2020 updates added in this update.
- Note that most years include small fires (< 200 ha); Most years > 1997 include fires > 0.1 ha; Most years 1950-1997 include fires > 10 ha; Most years < 1950 include fires > 100 ha.

SK:

- SK fire data updates provided by agency;
- This version of NFDB poly includes SK polys for 1945-2020;
- Missing years: 1951, 1954, 1965;
- 2020 updates added in this update;
- Note that most years > 1995 include fires > 50 ha; Most years < 1996 include large fires only (> 200 ha); Most years < 1980 include large fires > 1000 ha.

MB:

- MB fire data updates provided by agency;
- This version of NFDB poly includes MB polys for 1928-2020;
- 2020 updates added in this update;

- Note that most years include small fires (< 200 ha); Most years > 1997 include fires > 0.1 ha; Most years 1981-1997 include large fires only (>200 ha); Most years 1928-1980 include fires > 40 ha.
- Note: missing attributes (i.e. fireid, rep_date etc) for several years (1998-2003; and years < 1980) polys for small fires < 150ha missing for several years between 1980-1997;

ON:

- ON fire data updates downloaded from Ontario LIO website <https://www.javacoeapp.lrc.gov.on.ca/geonetwork/srv/en/main.home>
- This version of NFDB poly includes ON polys for 1963-2020;
- Missing years: 1959-1962, 1967, 1985;
- 2020 updates added in this update;
- Note that ON fire polygons include fires only greater than 40 hectares; Years > 1997 include fires > 40 ha; Years 1963-1997 include large fires only (> 200 ha);
- Note that the Ontario fire data has been produced by Natural Resources Canada under Licence with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2021.

QC:

- QC fire data updates downloaded from <https://www.donneesquebec.ca>
- This version of NFDB poly includes QC polys for 1972-2020;
- 2020 updates added in this update;
- Note that years > 1993 include fires > 10 ha; Years 1973-1993 include fires > 100 ha;
- The Quebec open data licence agreement is available here <https://www.donneesquebec.ca/fr/licence/#cc-by>

NS:

- NS fire data updates provided by agency;
- This version of NFDB poly includes NS polys for 1976-2020;
- 2020 updates added in this update;
- Missing years: 1959-1975, 1977-1979, 1981-1983, 1985-1986, 1988-1989, 1993-1996, 2002, 2005, 2010;
- Note that years > 2010 include fires > 0.1 ha; Years 1976-2010 vary in what data is included.

NB:

- No polygon data updates provided by NB for this version release;
- This version of NFDB poly includes NB polys for 1980-2013;
- Missing years: 1959-1979, 1989, 1994-1995, 1997-2006, 2008, 2011-2012, 2014-2020;
- Note that years > 1997 are mostly unavailable; Years < 1996 includes mostly small number of large fires.

NL:

- No polygon data updates provided by NL for this version release;
- This version of NFDB poly includes NL polys for 1980-2016;
- Missing years; 1959-1979, 2008, 2015, 2017-2020;
- Note that most years include large fires only (> 200 ha)

PEI:

- There are no fire polygon data for PEI in the NFDB

YT:

- YT fire data updates provided by agency for this version release;

- This version of NFDB poly includes YT polys for 1946-2020;
- 2020 updates added in this update
- Missing years: 1964, 1970;
- Note that most years > 1997 include small fires (< 100 ha); Most years 1946-1996 include fires > 100 ha.

NT:

- NWT fire data updates provided by agency for this version release;
- This version of NFDB poly includes NWT polys for 1965-2020;
- Fire polygon updates were made available for years 1986-2020 in this update;
- Note that all years include small fires (< 200 ha); Most years > 2001 include fires > 0.1 ha;

PC:

- No fire data updates were provided by Parks Canada for this version release;
- This version of NFDB poly includes Parks polys for 1923-2015,

* PROCESSING ENVIRONMENT Version 6.2 (Build 9200) ; Esri ArcGIS 10.5.0.6491

LINEAGE STATEMENT

The Canadian National Fire Database (CNFDB) is a collection of forest fire data from various sources; these data include fire locations (point data) and fire perimeters (polygon data) as provided by Canadian fire management agencies (provinces, territories, and Parks Canada).

La Base nationale de données sur les feux de forêt du Canada (BNDFFC) réunit les données sur les feux de forêt compilées par diverses sources, y compris les données sur la position (données ponctuelles) et les périmètres (données poly gonales) des feux telles que fournies par les agences canadiennes de gestion des feux (des provinces et des territoires et de Parcs Canada).

* SCALE 0

FIELD DESCRIPTION

Cause of fire as reported by agency

DESCRIPTION SOURCE

Agency/CFS - individual agency specific classification normalized into NFDB standard classifications: L- (lightning), H (human), H-PB (prescribed burn), U (unknown)

LIST OF VALUES

VALUE U

DESCRIPTION Unknown cause. May represent where cause is undetermined, or when information is not provided by agency.

ENUMERATED DOMAIN VALUE DEFINITION SOURCE agency provided cause

VALUE L

DESCRIPTION Lightning casued fire

ENUMERATED DOMAIN VALUE DEFINITION SOURCE agency provided cause

VALUE H

DESCRIPTION Human caused fire

ENUMERATED DOMAIN VALUE DEFINITION SOURCE agency provided cause

VALUE H-PB

DESCRIPTION Prescribed burn (human caused)

ENUMERATED DOMAIN VALUE DEFINITION SOURCE agency provided cause

VALUE Re

DESCRIPTION Reburn. examine for original cause

ENUMERATED DOMAIN VALUE DEFINITION SOURCE agency provided cause

ACCURACY INFORMATION

EXPLANATION

some agencies provided additional information on cause, but these have been normalized to conform to the standards set for this national dataset.

Hide Field CAUSE ▲

FIELD MAP_SOURCE ►

* ALIAS MAP_SOURCE

* DATA TYPE String

* WIDTH 50

* PRECISION 0

* SCALE 0

FIELD DESCRIPTION

Source refers to WHAT data source was used to identify and map the fire perimeter.

This attribute, together with the Method (which describes HOW the fire perimeter was created), provides insight into data quality and accuracy.

Note this attribute is in the process of being reviewed for national standards.

DESCRIPTION SOURCE

Source agency / CIFFC / CFS

Hide Field MAP_SOURCE ▲

FIELD SOURCE_KEY ►

- * ALIAS SOURCE_KEY
- * DATA TYPE String
- * WIDTH 50
- * PRECISION 0
- * SCALE 0

FIELD DESCRIPTION

Source_key may include keywords to provide additional information about the data source.

DESCRIPTION SOURCE

Source agency / CIFFC / CFS

Hide Field SOURCE_KEY ▲

FIELD MAP_METHOD ►

- * ALIAS MAP_METHOD
- * DATA TYPE String
- * WIDTH 50
- * PRECISION 0
- * SCALE 0

FIELD DESCRIPTION

Map_Method refers to process used to create or derive the fire polygon (the HOW). This attribute, together with Source (which describes WHAT data source was used), provides insight into data quality and accuracy. Note this attribute is in the process of being reviewed for national standards.

DESCRIPTION SOURCE

Source agency / CIFFC / CFS

Hide Field MAP_METHOD ▲

FIELD WATER_REM ►

- * ALIAS WATER_REM
- * DATA TYPE String
- * WIDTH 3
- * PRECISION 0
- * SCALE 0

FIELD DESCRIPTION

Indicates if water areas have been removed from the polygon area. Note this attribute is in the process of being reviewed for national standards.

DESCRIPTION SOURCE

Source agency

Hide Field WATER_REM ▲

FIELD UNBURN_REM ►

- * ALIAS UNBURN_REM
- * DATA TYPE String
- * WIDTH 3
- * PRECISION 0
- * SCALE 0

FIELD DESCRIPTION

Indicates if unburned islands have been removed from the polygon area.
Note this attribute is in the process of being reviewed for national standards.

DESCRIPTION SOURCE

Source agency

Hide Field UNBURN_REM ▲

FIELD MORE_INFO ►

ATTRIBUTE VALUE ACCURACY INFORMATION

ATTRIBUTE VALUE ACCURACY EXPLANATION

some agencies provided additional information on cause, but these have been normalized to conform to the standards set for this national dataset.

ATTRIBUTE

ATTRIBUTE LABEL MAP_SOURCE

ATTRIBUTE DEFINITION

Source refers to WHAT data source was used to identify and map the fire perimeter. This attribute, together with the Method (which describes HOW the fire perimeter was created), provides insight into data quality and accuracy. Note this attribute is in the process of being reviewed for national standards.

ATTRIBUTE DEFINITION SOURCE Source agency / CIFFC / CFS

ATTRIBUTE

ATTRIBUTE LABEL SOURCE_KEY

ATTRIBUTE DEFINITION

Source_key may include keywords to provide additional information about the data source.

ATTRIBUTE DEFINITION SOURCE Source agency / CIFFC / CFS

ATTRIBUTE

ATTRIBUTE LABEL MAP_METHOD

ATTRIBUTE DEFINITION

Map_Method refers to process used to create or derive the fire polygon (the HOW). This attribute, together with Source (which describes WHAT data source was used), provides insight into data quality and accuracy. Note this attribute is in the process of being reviewed for national standards.

ATTRIBUTE DEFINITION SOURCE Source agency / CIFFC / CFS

ATTRIBUTE

ATTRIBUTE LABEL WATER_REM

ATTRIBUTE DEFINITION

Indicates if water areas have been removed from the polygon area. Note this attribute is in the process of being reviewed for national standards.

ATTRIBUTE DEFINITION SOURCE Source agency

ATTRIBUTE

ATTRIBUTE LABEL UNBURN_REM
ATTRIBUTE DEFINITION
Indicates if unburned islands have been removed from the polygon area. Note this attribute is in the process of being reviewed for national standards.
